

January 2024

Dear Parents and Carers,

Minecraft Club

For the last 6 years, Thomas Keble has run a successful Minecraft club for students at lunchtimes. Minecraft is a hugely popular computer game where players can build, craft, collaborate, and explore in a vast range of environments. Following a change in Minecraft's licensing arrangements, we have purchased 31 individual player licenses, and these need to be allocated to named students.

If you think your child would be likely to regularly enjoy this club, please can you fill [this questionnaire](#)

If you are responsible for more than one student, please can you apply for each separately.

If the number of students wanting to take part exceeds 31, places will be allocated at random.

The club will be open three lunchtimes a week, from the week commencing 22nd January.

Tutors will inform successful students.

Thank you.

Mr Whalley
